TRADITIONAL FOOT GUA SHA MASSAGE

Three-section massage on the sole of the foot roller, scraping, shiatsu massage device. Accurately massage the acupuncture points on the feet. promote blood circulation, release the muscles tension , eliminate toxins.

The main task of the heart is to push the blood to flow, press the blood into the blood vessels, and then deliver it to the body to supply oxygen and nutrients to various organs and tissues of the body. It acts like a pump to drive the whole body's blood circulation and work tirelessly, so the body can run normally and healthily. And it is the turning point in the whole human blood circulation, and it needs to go back to the road back to the heart. Therefore, the foot needs to play a heart like role to promote bloodcirculation.

However, it is easier for blood to flow from the heart to the foot, but it is more difficult to return from the foot to the heart. First, the distance from the heart is the farthest; second, it is at the lowest position of the human body. When the blood flows to the foot, as the energy output from the heart gradually decays, plus the gravity of the heart, the gravity of the blood itself, etc., the speed of the flow begins to slow down, causing the blood volume to be reduced, and the blood will accumulate in the foot.

3D & 4D ROLLER MOVEMENT

The massage wheel is made of silicone material, which is more soft and simulates the hand while ensuring the massage strength, and achieves the massage effect. The original airbag propulsion technology, when the massage wheel is in contact with the human body, the airbag has a certain buffering effect, which can achieve the effect of being weak and strong. Different from the mechanical 3D (strut pushing method) on the market, it can achieve a softer massage effect with greater strength than hard. Breaking through the limitations of traditional 2D motor can only be used for flat massage. Innovative technology 3D stereo massage can achieve humanized massage techniques such as kneading, slamming, shiatsu, tapping, smashing, etc., through the ever changing combination of techniques to eliminate fatigue, relieve soreness, deep stimulation of acupuncture points.

MIND AND BODY RHYTHM MASSAGE

The music rhythm technology is integrated into the massage technique, so that you can enjoy the Chinese medicine massage at the same time effectively improve the massage effect, relieve the psychological pressure, make your massage experience reach the best state, and enjoy the perfect SPA massage.

DADICATED BACK HEATERS

The back is heated by penetrate 3-5 mm of skin and bring warm to the back. The core temperature of the 45 degree. The temperature per-the back pad is (The optimal for human hy-36-37 degree). When the are sore, the warming can expand laries, pro-blood circu-accelerate circulation to carry the the kidneys tion system. relax the system of our soothe our

REDUCE DISEASES OF THE SPINE

As the most important pillar of the human body, it is often easily overlooked. It is believed that the disease of the spine does not affect life, but a medical report in the United States awakened all humans a few years ago because the report pointed out that 70% of the human body's illness originated from the disease of the spine.
